RELEVANT WORK EXPERIENCE

Channel Code

Front End Developer   *April 2023 – Present*
RadHairArt.com
SolarTechExpert.com

- Launched web-accessible, responsive and user-friendly websites using **HTML, CSS, SCSS, JavaScript, React.js** and **Next.js** to effectively convey valuable information to clients' target audiences.
- Deployed a website for a solar installer certified with **Sunrun**, a 2.3 billion dollar company, ensuring brand alignment and a polished interface that streamlines client contact and scheduling through **EmailJS**.
- Crafted wireframes with **Figma** to design and launch a hair stylist website, where visitors can explore a gallery of work, access the scheduling portal and browse services and prices.
- Conducted productive client meetings to better understand business goals, while ensuring timely communication, progress updates and adherence to project timelines.

Polaris Eye & Laser

Ophthalmic Technician   *Nov 2023 - Present*

- Successfully achieved a 50% reduction in exam duration through proactive execution of patient testing and implementation of strong communication and teamwork with doctors.
- Rapidly adapted to emerging diagnostic technologies and evolving medical methodologies, ensuring proficiency in the latest advancements and meeting changing patient care requirements.

PROJECTS

Portfolio

johanamartinez.com

- Created a minimalist and intuitive multi-page website to display my projects by using **HTML, CSS, JavaScript** and **React.js.**
- Utilized **React.js** to implement an image slideshow for each project so website visitors can better understand the functionality of each project.
- Developed reusable components to significantly improve code modularity, ensuring consistent design and enhanced functionality across the application.
- Tracked tasks with **Trello** and successfully deployed using **Netlify**.

Clothing Store

johanamartinez.com/#/store

- Developed an online store web application containing a landing, login, register, and individual product pages with **HTML, CSS, JavaScript** and **React.js.**
- Retrieved product information from the **Fake Store API** through a **GET** request on women's, men's and jewelry categories, for users to easily browse products and view individual product pricing, descriptions and sizing.

Boba Tracker

https://www.johanamartinez.com/#/boba

- Led a five-person team using **Scrum** methodology to build a full stack web application where users can track weekly milk tea purchases and minimize spending.
- Prototyped and redesigned the UI using **Figma,** to create a more fun and visually colorful experience for users.
- Built an entry form with **HTML, Tailwind CSS, JavaScript,** and **React.js** where users can save drinks to an existing database by performing a **POST** request.

EDUCATION

University of California, Santa Cruz   **Santa Cruz, CA**
BS in Computer Science
